Licenses

Civil Engineer: CA & NV

Affiliations

Tahoe Engineers, Architects and Surveyors (TEAS), American Institute of Steel Construction (AISC), Contractors Association of Truckee Tahoe (CATT)

Overview

Dooley is a South Lake Tahoe native and is extremely knowledgeable about building in the region in general, including durable snow country design and practical, cost-effective framing methods for seismic performance. While in college, Dooley worked hands-on as a framing carpenter, and more recently he and his wife, Jeanette, have collaboratively designed and successfully built numerous spec homes in the South Lake Tahoe area. These combined experiences give Dooley an unusual level of insight into the specific views of both the Architect and the Builder.

In Dooley's portfolio as lead consultant and project principal are well over 200 residential project collaborations, many of them award-winning, with outstanding Architects such as:

- Smith Design Group / Lake Tahoe
- Gary McKelvey Architect / Lake Tahoe
- BAR Architects / San Francisco
- JLS Design / Truckee
- Elise Fett & Associates / Lake Tahoe
- Marmol Radziner / Los Angeles
- Ryan Group Architects / Truckee
- John Malick & Associates / SF Bay Area
- James P. Borelli AIA / Lake Tahoe
- Doug Eddy AIA / Lake Tahoe
- Kelly Stone Architects / Truckee
- Lot C Architecture / Truckee
- Swaback Partners / Scottsdale
- Sudhausen Designs / Lake Tahoe

Dooley brings outstanding teamwork, creativity and attention to detail to each of his projects.
